Pico desk top washers to include in your [Steri Installation](#)

For both the desk top and floor standing units, Pico provides controlled automated cleaning, disinfection and drying of dental instruments and hand pieces. The combination of a high-pressure spray arm and the patented Pulse Flushing System, ensures that your instruments and hand pieces are thoroughly cleaned and disinfected both internally and externally. Using the Pico automated washer disinfector demonstrates your compliance with documented best practice. Pico's one-touch operation offers the best option for the control and repeatability of the cleaning process; which in turn can be validated and documented to provide a permanent record of your decontamination procedure....
